WHERE CAN I FIND A STUDY

Go to Studies

Under ‘Study Proposal’, you can find the studies you may be eligible for based on your profile.

DON’T SEE ANY STUDIES LISTED HERE?

There are three possible reasons:

- We only show studies that match your personal profile. If there are no studies available for which you are eligible (for example due to age), no studies will be displayed.
- You are currently active in a study. New studies will automatically appear in your profile once your participation has ended.
- The study has moved to another tab

THE TABS IN MY PIONIER

In My Pionier, studies are automatically moved to another tab when their status changes. For example, when you can schedule a screening appointment or when you are not eligible for a study.

Can't find a study on the homepage anymore? Be sure to check the other tabs!

- **Study Proposal**: Here you can find all studies you may be eligible for based on your profile.
- **Registered**: Once you register for a study, it moves to this tab. Your registration will now be reviewed by our recruiters.
- **Approved**: Your registration has been approved by a recruiter. The study moves to this tab, and you can now schedule a screening appointment.
- **Rejected**: Your registration has been rejected by a recruiter. The study moves to this tab, where you can also find out why you are not eligible.
- **Not Available**: Does a study not fit your schedule, or would you prefer not to participate? Simply click 'Not Available' for that study under Available Studies. You can then find the study in this tab.
- **Full**: Here you can find studies for which we are no longer recruiting new participants.
